

Site Visit

Central Kowloon Route – Ho Man Tin Access Shaft

Date and Time: 20 October 2018 (Saturday) 9:30 am to 11:00 am

Project Introduction

Central Kowloon Route (CKR) is a proposed dual 3-lane trunk road across central Kowloon linking the West Kowloon in the west and the proposed KTD in the east. It will connect the West Kowloon Highway at Yau Ma Tei Interchange with the road network at Kowloon Bay and the future Trunk Road T2 at KTD in order to fulfill the need for additional traffic capacity on the east-west road links across central Kowloon, particularly for coping with the new developments on its western and eastern sides.

Ho Man Tin Access Shaft is one of the eight contracts of CKR. The main works include construction of a vertical access shaft of approximately 100m deep with 21m internal diameter and horizontal directional coring (HDC) approximately 3.6km long and the associated fieldwork and laboratory testing.
